

FARR RENOSTERBERG Project (Philipstown, Petrusville, Keurtjieskloof):

International FASD day 9 September 2019

FARR Keurtjieskloof presented a 'fun run' on the 9th of September to raise awareness among the community. This event was followed by two 9m races. The participants were 3-year old toddlers, the children of our first Healthy Mother Healthy Baby Programme© clients. The children who placed 1st, 2nd and 3rd each received a scooter while the rest each received a tennis ball.

To commemorate International FASD Day, the staff from our FARR Petrusville office collaborated with the local clinic, to walk a 9km relay. Each team consisted of 9 participants each of whom had to complete 1km. The winning team won a delicious cake. A 9 m race was also held for the local 3-year old toddlers. Once again, those who placed 1st, 2nd and 3rd were spoilt with scooters and the rest each received a tennis ball.

FARR Phillipstown commemorated International FASD Day by planting 9 trees at 9 different departments. These trees symbolize pregnant women. The various departments were asked to take good care of the newly planted trees for their care would be a symbol of how well they as a department are willing to care and support pregnant women.
